

Blue Lime Labs is a Danish capital pre-seed investor and business accelerator scouting for progressive B2B ideas to invest and co-develop globally.

We partner with founders, designers, engineers and other talented and ambitious people worldwide to build awesome companies from scratch.

Pulsetip, Raceoptimizer and Harba are startups of international scope we built within the first year of our activity, and we are planning to expand rapidly during the upcoming years.

By joining Blue Lime Labs team you will never be bored with the same tedious tasks, as there is always an opportunity to rotate between projects and innovate on them.

## Internship at an International Business Accelerator

**Challenge yourself on multiple startup projects and kick-start your career at an international business accelerator!**

We are looking for diverse candidates who would be interested in:

- Conducting market research;
- Understanding and structuring business processes;
- Developing B2B IT solutions;
- Testing products and services;
- Understanding and getting to know programming languages and trending technologies;
- Communicating and searching for prospect clients;
- Delivering other daily ad-hoc business tasks.

**We offer a vibrant environment to learn, broaden your network, gain hands-on experience and show your talent.**

You will not be expected to bring coffee or stand at the printer. We will constantly challenge you to:

- Learn more and work on your own with team supervision;
- Be proactive and actively engage in all business processes.

**We commit to transfer our knowledge and enthusiasm to help you in gaining as much experience as you are willing to get.**

Candidates from a variety of fields and backgrounds are welcome to apply - sales, marketing, IT, business development, design, electronics, etc.

Successful candidates can be offered full-time positions both at the accelerator or at a start-up.
